

White Rodgers, TopTech Media Air Cleaner Replacement Filter

THE 4 INCH MEDIA AIR REPLACEMENT
FILTER IS A HIGH-EFFICIENCY SOLUTION
DESIGNED TO ENHANCE INDOOR
AIR QUALITY BY REDUCING
AIRBORNE PARTICULATES.

IT'S A CONVENIENT AND EFFECTIVE
CHOICE FOR VARIOUS APPLICATIONS,
THANKS TO ITS ROBUST
CONSTRUCTION AND EASE OF USE.

PERFORMANCE:

1. **Filtration Efficiency:** The non-woven, 4-inch thick, pleated media filter is capable of trapping small particles, ensuring excellent air purification.
2. **Low initial pressure drop**
The 4 inch Media Air Cleaner replacement filters are ideal for users looking to improve indoor air quality with a reliable and efficient filtration system that offers flexibility in performance levels and robust construction.

MERV 11 & 13

Fits all brands using 3-3/4" deep cabinets

Here are key features & benefits of these filters:

FEATURES:

1. **High Efficiency:** Excellent at capturing and reducing airborne particulates such as dust, pollen, mold spores, tobacco smoke, pet dander, and virus-carrying particles, significantly improving indoor air quality.
2. **Robust Construction:** Features superior frame strength with double-wall construction and die-cut fingers, ensuring durability and consistent performance.
3. **Wire Mesh Support:** A galvanized rust-resistant wire mesh supports the integral filter media, maintaining pleat shape even as the filter becomes dirty.
4. **Durability:** The heavy-duty moisture-resistant filter frame retains its strength and shape even in high humidity environments, ensuring longevity and consistent performance.
5. **User-Friendly Design:** No assembly is required, as the filter easily inserts into and removes from Aprilaire cabinets, making maintenance straightforward and hassle-free.
6. **Longevity:** The filter can last up to 6 - 12 months depending on conditions, providing a long-lasting solution for maintaining clean air in your environment.
7. **Made in the USA:** Ensures quality manufacturing standards and supports local production.
8. **Fits:** White Rodgers, Top Tech and other brands.

MERV 11 PRESSURE DROP

MERV 11 PARTICLE SIZE EFFICIENCY

TESTING STANDARDS - ASHRAE 52.2 (MERV)

Minimum Efficiency Reporting Value (MERV) is a value expressed on a 16 point scale to reference appropriate particulate matter removed in 3 different range groups. The higher the MERV rating, the greater the percentage of particles captured on each pass. This testing method is conducted at seven different airflow rates, with the final resistance being twice that of the initial resistance.
